

التربية بلدية

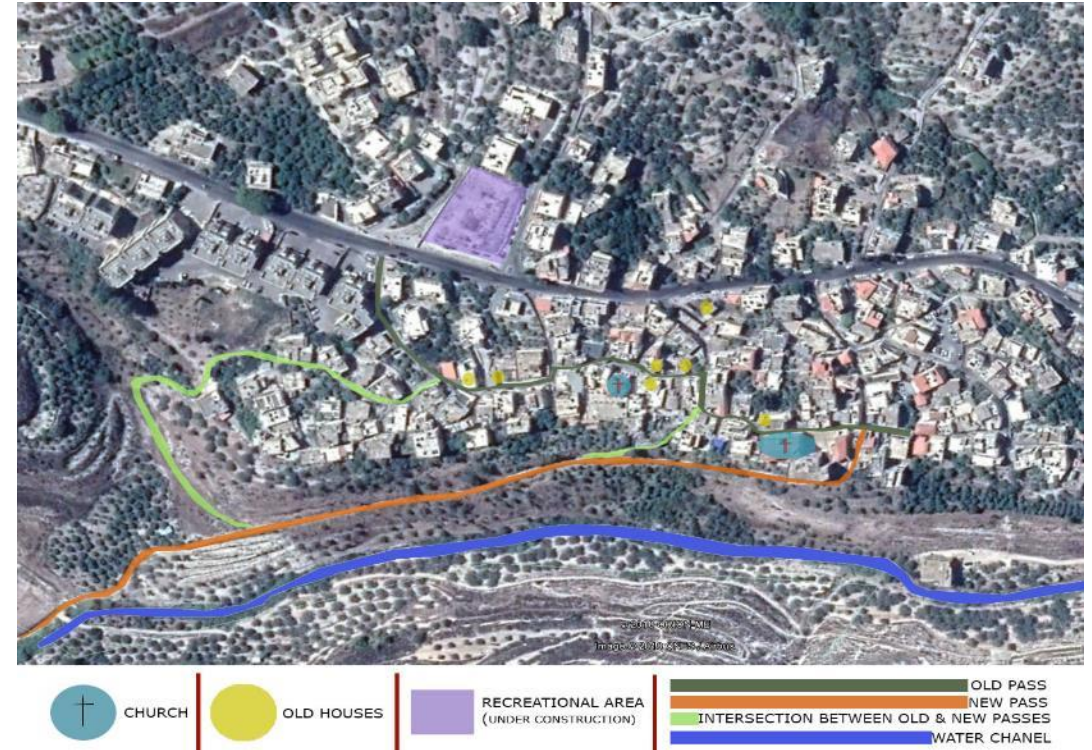

Between economic development and crisis

Geographical, demographic and economic reality.:

- 1. Geography**
- 2. Population and number of refugees.**
- 3. Living conditions before crises.**
- 4. The reality of the Lebanese municipalities.**

Sustainable economic development: rural tourism

Targets:

- Preserving green spaces and encouraging owners to invest.
- Creating sustainable jobs
- Encouraging women to work
- The traditional food market.
- Lebanese guesthouses
- An investment of skills.
- Putting the town on the tourist map.

Crisis update.:

COVID-19 pandemic

- Forced closure of most production sectors.
- A concerning rise in unemployment
- Loss of purchasing power
- Social and economic panic.

October 17th, before and after:

- The beginning of a downward spiral.
- Unemployment
- Losing faith in national currency.
- Confusing banking processes

Municipalities facing impossible missions:

- Rescheduling priorities
- Limiting daily work to emergencies.
- Conducting periodic statistics for poor families
- Sterilizing public places.
- Creating a crisis cell
- Preventing new arrivals
- Semi-daily awareness campaigns
- Distribution of subsidies to the poor and vulnerable
- Provision of psychological support

COVID-19
Coronavirus

The world after COVID-19: where to?

Proposed solutions:

- Solidarity at the national and international levels.
- Activating international partnerships.
- Direct contributions to municipalities
-
